

HERBERT R BURNHAM
MULTI-USE DIAPER

PRIOR ART STATEMENT

A search in the field of disposable diapers, years 1996-2001 yielded 55 patents. Of these, none discloses any multi-use characteristic as set forth in this application.

Most patents relate to shape, enhancement or addition to an absorbing agent, improved absorbency of liquids and the like.

Processes for manufacturing diapers or parts thereof, all deal with the basic, known characteristics of the conventional disposable diaper. None suggests the invention as described in this application.

Copy of search results, comprising only patent number and title is enclosed.
